Hand Control Surgical Pencil

Autoclavable

■ Reliability of a product developed in collaboration with users

The design of the COMEPA reusable surgical pencils with its extra flexible silicon cable procures an excellent gripping and a **high accuracy** of movement. The two different CUT and COAG switches allow a **safe use**. This product meets the highest requirements of the surgeons.

■ A total security during all surgical operations

The choice of high level quality components and the conception of the product provide a **long operating life**. This gives you a very good quality/price ratio. Pencils are adapted to any disinfectant used in operating theatre and can be sterilised up to 200 times by autoclave at 134°C.

■ A full range to answer to every needs

With two types of connection, surgical pencils can be adapted to all types of generator. The cable length is 4 meters. Products are available in 3 and 5 meters under request.

■ Compatible products conforming to standards

The COMEPA surgical pencils are **compatible** with all the generators on the market. For ERBE T/ACC/ICC and LAMIDEY units, an adapter can be used to connect a 3 banana plug pencil.

3 pin connector Ø 4 mm

MN BE115

VALLEYLAB - MARTIN -BERCHTOLD -
AESCULAP - EMC DOLLEY

1 pin connector Ø 5 mm

MN BE155

ERBE ACC/ICC

■ Technical data :

- Packaging :** one piece
- Electrode connector :** Tinned brass machined contact from Ø 2.35 to 2.40 mm
- Cable length :** 4 m standard
3 m and 5m under request
- Generator connector :** Nickel plated flexible connector Ø 4 or Ø 5 mm
- Cleaning - Disinfecting :** Polysulfone material - Softening point: 174°C max.
Compatible with disinfectants used in operating rooms
Cleaning in washing machine at 90°C
- Sterilisation :** Autoclave at 134°C up to 200 times

Active Electrodes

for Pencil

■ A full range for all applications

The COMEPA active electrodes provide a large choice of possibilities to surgeons. Numerous sizes and shapes give the right answer to all types of needs. The COMEPA electrodes can be adapted on pencils with the insurance of a high reliability during the use.

Isolated electrode Ø 2.4 mm - Medical stainless steel - Sterilisation by autoclave at 134 °C during 18 minutes.
Packing by 10 pieces.

Blade Electrodes : Incision and Coagulation

Part number	Length
MN CO150	150 mm
MN CO120	120 mm
MN CO84	84 mm
MN CO65IP	65 mm
MN CO46	46 mm

Needle Electrodes : Incision

Part number	Length - Diameter
MN AI150I08	150 mm - Ø 0.8 mm
MN AI150I10	150 mm - Ø 1.0 mm
MN AI84I08	84 mm - Ø 0.8 mm
MN AI84I10	84 mm - Ø 1.0 mm
MN AI65I08	65 mm - Ø 0.8 mm
MN AI65I10	65 mm - Ø 1.0 mm
MN AI50I08	50 mm - Ø 0.8 mm
MN AI50I10	50 mm - Ø 1.0 mm

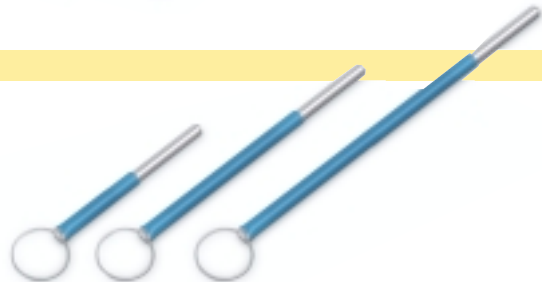

Ball Electrodes : Coagulation

Part number	Length - Diameter
MN BO120I3	120 mm - Ø 0.3 mm
MN BO120I5	120 mm - Ø 0.5 mm
MN BO84I3	84 mm - Ø 0.3 mm
MN BO84I5	84 mm - Ø 0.5 mm
MN BO65I3	65 mm - Ø 0.3 mm
MN BO65I5	65 mm - Ø 0.5 mm
MN BO50I3	50 mm - Ø 0.3 mm
MN BO50I5	50 mm - Ø 0.5 mm

Handle Ø 10 mm Electrodes : Incision

Part number	Length
MN AN84I10	84 mm
MN AN65I10	65 mm
MN AN50I10	50 mm

Electrode for Arthroscopy

Part number	Length
MN AR150I2	158 mm

Solutions for all your needs ...

COMEPA, manufacturer of electromedical accessories for HF surgery, offers you a complete range of products especially dedicated to intensive use in operating theatre.

■ Disposable Surgical Pencil

The **innovative concept** of ready to use surgical pencil prevents from cross contamination problems and frees of sterilisation process.

■ PLACOM® Pregelled Surgical Plate

A **full range** of disposable plates, compatible with all applications, adaptable on any generator.

■ Connecting Elements for Surgical Plate

Compatible connecting elements between plates and generators. Different connectors for any generator used.
